## Project Title: Artemisia Gentileschi Website

I think that I want to build this site as multiple pages, rather than a scrolling single page. This will allow for her paintings to get their own, and to design a really nice home page and menu.

- Home Page/Introduction – Large photo of one of her self-portraits with her name at the top. A short intro to who she is. A menu to click to the other pages.
- Biography – this page will be organized chronologically
- All her works – a grid that you can click on for more info on each one?
- Legacy – this will include her artistic importance, feminist perspectives on her & her influence on pop culture
- Other women artists of the Baroque Period
- Sources – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
