

Creative Director: Christine Watridge

Designer: Jessica Lee

Revised Mockup:

- looks great! font choices work really well together

How Website comes to life (Responsively!):

- if it's easier to toggle paragraph info below images in gallery than do that! (ie if you can't figure out the brown bar on top of images)
- simple top bar should work for responsive design, I'm not sure a hamburger menu is necessary
- maybe at smaller size the "Artemisia Gentileschi" text goes to just AG to give more room for home, biography, gallery & legacy
- maybe at mobile size the gallery grid is just one photo wide and all of it is stacked
- for the legacy and biography pages, consider a slightly different, but still simple layout:
 - image on left side, while text falls next to that all the way down with a larger left margin
 - example:
